SLIDE 01

Smart Study Companion

Improving Academic Productivity with AI

⚠ The Problem

Traditional weekly revision involves manually reading lectures, extracting definitions, preparing summaries, and assessing understanding.

68 min

Measured manual revision time

SLIDE 02

Our Solution – Smart Study Companion

THE WORKFLOW

1. Lecture
2. Summary
3. Quiz
4. Feedback
5. Revision Plan

AI responsibilities

- Summarization
- Quiz generation
- Preliminary feedback
- Identifying weak topics

My responsibilities

- Selecting sources
- Answering independently
- Verifying information
- Approving the final revision plan

SLIDE 03

Live Demonstration

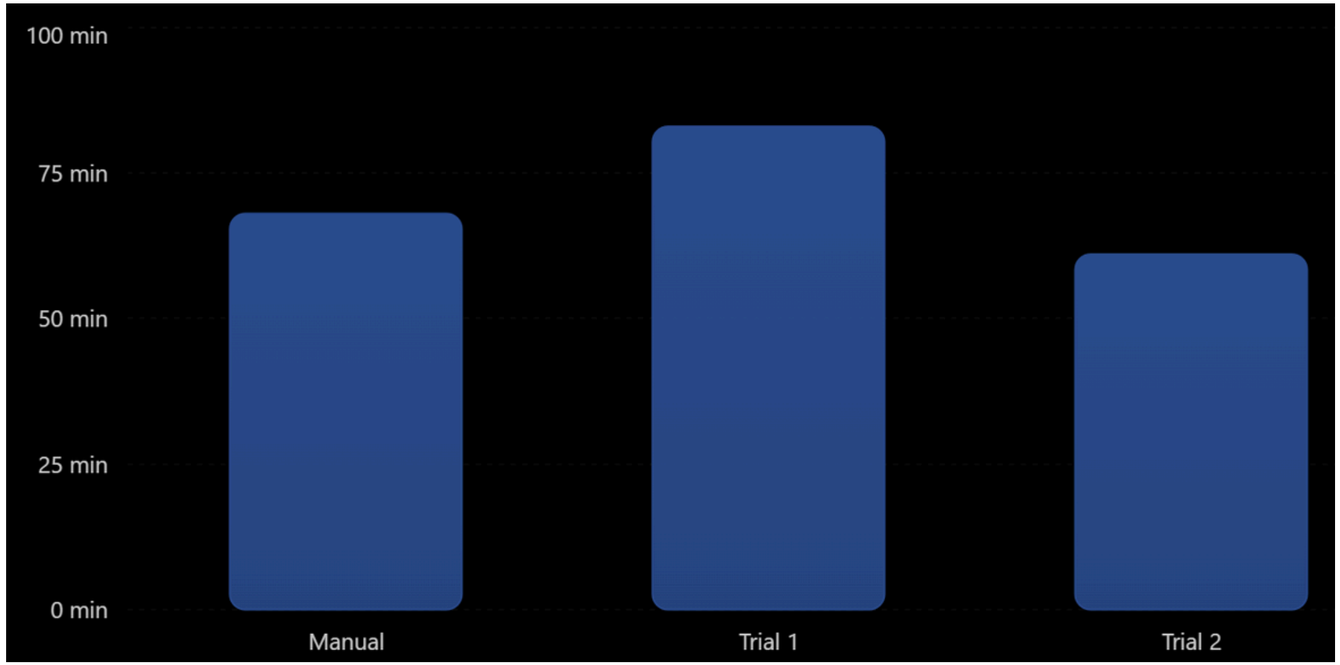

How Smart Study Companion Works

1. **Upload a lecture.**
2. **Generate a source-grounded summary.**
3. **Answer an interactive quiz question.**
4. **Receive feedback and identify weak topics.**
5. **Test whether the assistant refuses unsupported information.**

SLIDE 04

Measured Results

Revision Time Comparison

Metric	Manual	Trial 1	Trial 2
Time	min 68	min 83	min 61
Quiz score	8/10	6/10	10/10

Test Case	Result
Time	Correct explanation with source
Messy	Correct distinction between concepts
Edge	Refused unsupported information

Average AI time: 72 minutes.
Overall time change : +5.9% (4 minutes slower than manual revision) .
Trial 2 improvement: 7 minutes faster than manual revision.

Key finding: Trial 2 was 7 minutes faster than manual revision, while the average of both AI trials was 4 minutes slower.

Risks & Future Plan

Key risks

- Incorrect explanations or fabricated references.
- Overreliance on AI-generated summaries.
- Revealing answers before the student's attempt.

Controls

- Use approved lecture materials only.
- Verify answers against the original sources.
- Keep final judgment and learning responsibility with the student.

30-Day Plan

Repeat revision sessions, measure time and accuracy, improve instructions, and decide whether to continue, modify, or stop.
